### WILLIAM C. WHITNEY

Cleveland's Secretary of The Navy Dead of Appendicitis.

One Of The Richest Men In A City Of Millions.

New York, Feb. 2.—William Collins Whitney, former secretary of the navy, died a few minutes after 4 o'clock this afternoon, at his home on Fifth avenue. He died while under the influence of ether, administered preparatory to a second operation for appendicitis. By his bedside were his son, Harry Payne Whitney, and daughter, Dorothy Whitney, as well as Dr. William T. Bull, the chief surgeon in attendance. Mr. Whitney was in his sixty-fourth year.

William Collins Whitney was secretary of the navy from 1885 to 1889, and had been a prominent figure in politics and later as the owner of race horses. He was a graduate of Yale and of the Harvard law school, was inspector of schools in 1872, and corporation counsel for New York 1875-82. He was active in the movement against the Tweed ring and helped to organize the Young Men's Democratic club in 1871. Mr. Whitney was a son of the late General James S. Whitney. He was born at Conway, Mass., July 15, 1841.

To the church of St. Peter and St. Paul, Hopkinsville, \$300; J. H. and P. M. Skarry, of Hopkinsville, \$100 each; Jonath Skarry, Nashville, Tenn., \$100, the Kentucky Bank and Trust Company, trustee for Lizzie and Virginia Kilroy, \$500 each; Emily Robertson, trustee for her sister, Rose Kilroy, \$500.

The residue of her estate goes to her sister, Emily Robertson.

### SLAYER OF BEVERLY NEGRO

On Trial a Second Time at Madisonville.

The trial of Garth Thompkins, col., for the murder of Jim Brame, also colored, of Beverly, this county, will begin at Madisonville today. Tompkins was tried once and sentenced to hang. An appeal was taken and the court of appeals reversed the lower court on the grounds that Brame's wife, who was formerly the wife of Tompkins, was allowed to testify in the case.

### VICTIM OF CONSUMPTION.

Miss Cora Lee Watkins Dies at Lebanon, Tenn.

Miss Cora Lee Watkins died at Lebanon, Tenn., Wednesday night, of consumption. She was about 18 years old and a daughter of Mrs. Geo. V. Donnell, who moved from Beverly to Lebanon last year. She had been in a rapidly sinking condition for several months. Her father was the late A. H. Watkins. The body was brought to this city last night and will be interred from Locust Grove church, in the family burying ground, at 10 o'clock today.

### BUYING MULES

To be Shipped to Cotton Plantation in Mississippi.

Mr. W. R. Ely, formerly of this city, but now of Itasca, Miss., is here on business. Mr. Ely is a merchant, and is also interested in a large cotton plantation. He is looking around with a view of buying thirty mules to be used on the farm next season.

### JEALOUS HUSBAND

Kills J. K. Shrader—Dead Man Denied His Guilt.

W. E. Neal Fired the Bullet in a Louisville Hotel—Married a Hopkinsville Woman.

Louisville, Ky., Feb. 2.—James K. Shrader, a prominent young lawyer, of this city, who had just completed a term as Assistant Commonwealth's Attorney, died today at the City Hospital from the effects of a bullet wound inflicted at midnight by Wm. E. Neal, of Lawrenceburg, Ky. The trouble arose, it is said, over a suspicion which Neal entertained as to Shrader's relations with Mrs. Neal. Neal has been arrested and is now in jail.

The shooting occurred in the cafe of the Capital Hotel, where Neal found Shrader talking to the bartender. Neal, it is said, without speaking a word to Shrader, drew a 35-caliber revolver from his coat pocket and opened fire. Shrader started to run into the office when he saw the pistol. The first shot missed Shrader and passed close to several other guests of the hotel, who were sitting at a table writing. The second shot struck Neal's victim in the arm and the third entered the back. Shrader fled behind the desk in the office and bystanders attempted to disarm Neal, as he prepared to fire again. He was thrown against the glass partition in the barroom in the effort to secure his revolver, broke the glass and severely cut his hand. He tore himself free from the men who were attempting to detain him and dashed out of the door, only to run into the arms of his wife.

Wm. E. Neal is 32 years old and was born in Lawrenceburg, Ky. He is the only son of Wm. Neal, a prominent farmer of Anderson county, who once represented his district in the Legislature. He left Lawrenceburg about four years ago and has since been living in Louisville except for one year, which he spent in Hopkinsville. He came here two weeks ago with his wife and has been living at the Capital Hotel.

Mr. Shrader was one of the best known of the younger men of the local bar. He was considered an able and energetic young man and was appointed Assistant Commonwealth's Attorney by Hon. Jos. M. Huffaker when he was first elected Commonwealth's Attorney. During his term in office, Mr. Shrader did excellent work in the courts, but made a reputation as a high liver. When Mr. Huffaker was re-elected last November, he refused to re-appoint Mr. Shrader on the ground that his conduct had not been becoming an officer of the court.

Since then he had been practicing his profession and has lived at the Capital Hotel.

Shrader was removed to the City Hospital, where he was joined by Mr. Huffaker and Dr. Harry Kelly, City Coroner, whom he had known in official life for several years. Just before being placed under an anaesthetic to undergo an operation, in the hope of saving his life, Shrader, realizing that death was near, made an ante mortem statement to Dr. Kelly, saying Neal was laboring under a great misapprehension when he shot. He said he had never seen Mrs. Neal and had nothing to do with her. When the statement had been finished, Mr. Shrader bade his friends good-bye, saying: "Give my love to all, I am not afraid to die."

### Makes Full Denial.

Mrs. Josephine Robinson, of Hopkinsville, the mother of Mrs. William E. Neal, arrived in Louisville Monday in response to a telephone message sent that morning by Mr. Neal. She went at once to the home of her sister, Mrs. Thos. H. Glover, 1417 Garvin Place. She did not find her daughter until yesterday afternoon at the Louisville Hotel and immediately had her

### EFFORT ABANDONED.

Burley Tobacco Interests Will Not Be Pooled.

The Burley Tobacco Growers' Association has abandoned the effort to handle the present crop of tobacco, and will release its members from the terms of the existing contract with the association by which they were to hold their production until such time as the association would dispose of it. President W. B. Hawkins stated that the association would be kept intact and that it would be thoroughly financed next season, when it will control, as it expects, the burley crop. This action brings to an end for this season the controversy in regard to the burley crop, and it will find its way to the market through other channels.

### LOOSE TOBACCO.

About 50,000 Pounds Sold Here This Week.

There was a fairly good sale of loose tobacco on the floor by R. M. Woodridge & Co., Tuesday. About 50,000 pounds were disposed of. All of the weed offered was very common and prices were considered good for the kinds sold.

Lugs ranged from \$2 to \$2.90 and leaf from \$3.75 to \$6.00. Owing to the cold weather loose receipts have been light this week.

There were no sales on the breaks, but 83 hogheads of tobacco were disposed of privately.

Receipts for the year amounts to ten hogheads. Sales for the year 295 hogheads.

### Fully Satisfied.

M. J. Haddix, chief engineer of the Burlington water works, was out to call on members of the old Burlington Volunteer Fire Department, and since 1878 has been in charge of the big engines and machinery of the Burlington water works. He writes as follows:

Burlington, Iowa, Dec. 27, 1902.

Dr. Caldwell, Monticello, Ill.

Dear Dr. Caldwell: I am satisfied with stomach and bowel trouble, and when other medicines had failed, we began giving her Syrup Pepsi. We are fully satisfied with the result, and I can highly recommend it to my friends for these troubles.

Yours respectfully,

M. J. Haddix.

### Secured Control.

The Dupont Powder Company has secured control of the manufacture of powder on the Pacific coast.

Rev. Joseph G. Wright, editor of the Diocese of Springfield, Greenville, Illinois, writes: "I am pleased to acknowledge the merit of your medicine. Dr. Caldwell's Syrup Hepsin, and thank you for placing such efficacious remedy for stomach and bowel troubles on the market. It always keeps your medicine in the houses of all other kind. For persons of sedentary habits a laxative and stomach tonic is a necessity, and Syrup Pepsi meets my requirements in this line better than any medicine I ever used. Keeping me in splendid health."

### EGYPTIAN CEMETERY.

Relics of Prehistoric Times Found in the Valley of the Nile.

Mr. John Ward, F.S.A., writing in the London Antiquary, gives some very interesting details of excavation work carried on up the Nile some months ago. Many thousand tombs, mostly prehistoric, have been opened. Most of them have no inscriptions whatever, but in some cylinders and scarabs were found with inscriptions so old that it will require great study to decipher their meaning. Most of the remains are mere skeletons, and have never been mummified. These were generally found lying on their side, their face to the east, their knees drawn up to their chins. Nearly all of the poor old skulls still possessed excellent teeth. Some exquisitely formed alabaster dishes and vases, not turned in the lathe, but wrought by hand, and a cylinder of solid gold were found in the tombs, nearly all of which had been tunneled into by robbers thousands of years ago.

In one tomb a fine papyrus was discovered; the owner had it buried beside him, that he might peruse it at his leisure in the future state. It was a portion of the Egyptian Bible, the "Book of the Dead." Many of the larger tombs had facades built of brick, with one or two chambers outside the rock-cut portion. Others were closed by hut-shaped erections over the mouth of the shaft, and it was very extraordinary (says Mr. Ward) on descending one of these shafts to see several lateral chambers cut in the crumbling rock, each with its ghastly occupant, placidly lying on its side, its hand up to its head, or else with the knees drawn up to the chin. But the most curious style of burial, and one that has never been seen before, so far as Mr. Ward knows, is the following: Numbers of boxes were found, especially in the northern part of the huge cemetery, about three feet by two feet, and nine inches deep. In each of these there was found a complete adult skeleton. A friend of the writer, who proved to have the courage of his convictions, recently informed him that it almost threatened to result in divorce when his first wife saw him without his "tail," but after she had got used to the loss she was heard to say that it was a pity others would not follow her husband's sensible example. The change in this direction is impeded, but with the return of the Penang lads who are sent to complete their studies in Europe, this obstacle may eventually be removed. The monials, too, have caught the contagion of reform, but in a lesser degree.

Turning to their social life, the bright and shady side-sights require to be touched upon. In regard to the relationship between husband and wife it cannot be gainsaid that an ornate desire to place the latter on an equal footing is more noticeable each day. A husband is not now ashamed to give his companion a seat with him in an open conveyance, or even escort her to a picnic, where necessarily the men and women mix with each other. On the other hand, cases of wives leaving their husbands are of frequent occurrence, the real causes of which may be summarized as follows: The husband leads a life of debauchery, cultivated in the so-called Intellectual Improvement Clubs, where literature, supposed to be their primary object, is almost unknown. The wife, finding that the husband longer more for his club than his home, naturally resents the change, and, her remonstrances being in vain, she seeks the company of her relatives.

As against the fair sex, the horrible scourge of Peh Bin is to a very great extent responsible for his downfall. She first indulges in a "gentle flutter" only to be lured into the irresistible influence as if by magic, and from small it grows to big stakes, until the husband discovers that his wife has substituted her jewelry for gilt or imitation.

### CHINESE OF PENANG.

Adopting Modes and Customs of Their European Neighbors.

The Penang-born Chinese are not slow to recognize that to be progressive they must keep pace with the onward march of the times. So general has this feeling become that within the last decade rapid strides have been made in the direction of reform. There are, however, still many difficult barriers to be negotiated, but with determination these may be surmounted, says the Penang Straits Echo.

It may be pertinently asked what the goal is at which the Straits Chinese should aim. To begin with, they should adopt the European costume, as the Japanese have done. A foreigner to Penang, or the native states, can easily distinguish the difference between a Straits-born Chinese and a celestial proper. This, to some extent, shows that the Straits Chinese are progressing in the right direction. The fashion of the latest cut is closely watched by them, so much so that in Kuala Lumpur an outfitting department owned by a Penang-born Chinese has been established to further this object; loose and baggy trousers, which are an incubus to cyclists; coats as if made to provide for bodily growth; Sin-Chang shoes from China are gradually but surely giving way to tight trousers, collars, jackets and English-made boots, while as for the headgear, white hats are becoming popular, such as "Panamas," the Straits and Ellwood's.

White to the Chinese is a sign of the deepest mourning, but the Babas of to-day have learned the absurdity of sticking to antiquated customs and sentiments. The towchang (queue), a standing menace to cyclists, mechanicians and others, is wisely discarded by some, but this dereliction of ancient custom is still looked upon with great horror by the fair sex, who, in conjunction with the scholars of Chinese literature, retain their conservative admiration for it. A friend of the writer, who proved to have the courage of his convictions, recently informed him that it almost threatened to result in divorce when his first wife saw him without his "tail," but after she had got used to the loss she was heard to say that it was a pity others would not follow her husband's sensible example. ### PHILOSOPHY OF A TRAINER.

Negro Who Ran His Horse to Death While He Slept.

Charles Littlefield, according to the Illustrated Sporting News, tells the following reminiscence of his early days as a jockey, when racing had a strong hold in the south, some time before the war.

It was down near Alexandria, La., a lazy old negro known as "Uncle Eph," who had won a spurious reputation as a trainer of thoroughbreds, because he had been lucky enough to train two or three good horses, was preparing a horse for a race at mile heats. Eph was above all things an optimistic philosopher. Nothing that could happen would he profess to wish otherwise, and Mr. Littlefield's story aptly illustrates this particular trait.

Uncle Eph stretched himself in the shade of a big live oak that was growing in the infeld, not far from the judges' stand, and instructed his little ebony exercise to gallop the horse two miles. The morning was a hot one, and Eph was sleepy; so sleepy was he, in fact, that he was just a trifle irritated when the boy pulled the horse to a standstill in front of him and asked for instructions.

"Also, done galloped him two miles, sah; shall I round again?" Uncle Eph looked up, and, raising himself upon his elbow, looked sternly and reprovingly at the boy and said: "Now you look heal, you lazy, no account, little black nigger, you just gallop dat horse around dat track again, and agin, and agin, an' you keep him goin' till I tell you to stop, d'yeh hear?"

If a cheese is to be cut it must be done in the increase of the moon, or by the same token, it will fade away with incredible rapidity before the daily demands of the family, who will yet derive a miraculously scanty nutriment therefrom; whereas if, in obedience to the sage counsel of the elders of the house, it is done as the moon waxes, it will like the widow's morsel be of meat and curse of oil.

If fence posts are to be set spade must not be put to the ground till the position of the sun in the zodiac be determined from the book of fate, the almanac. Otherwise it is only a matter of time when not the frost below, but the stars above will baffle them from their posts. The swine must not be slaughtered with disregard to the stellar divinities or the pork will dwindle in the barrel as if an army corps were feeding thereon.

In the sowing, tilling and harvesting of their crops, of course, the same fidelity to the old-folk notions of their fathers is shown; but in this they are not peculiar, for here their ideas are shared by the unscientific of every class and race. In a Waterloo business place recently, where these signs were under animated discussion for an hour, only one man raised the voice of skepticism against these fancies, and all but two of those expressed positive faith in one or more of the signs of Fayette Dutch folk-lore.

Uncle Eph yawned, rubbed his eyes, and then sat upright, blinking in owl-like fashion at the hot sun that had been fiercely beating upon him for the last hour. Then, looking about him, he turned to Sam with the question: "What's dat hoss?"

"He done dropped dead over at the half-mile pole."

"What's dat you say, nigger, dropped dead?"

"Yes, he dropped mos' ten min'utes back."

"Wal, I reckon it's jest as good as he did. If he can't stand work he can't stand racin', an' it's jest as good he'd run fer. He won't cost no mo' oats nor no mo' trainin' bills."

WOMEN AT PARTIES.

Often Go for Fear of What Other Women Might Say.

The society reporter has made a great discovery during the week, says the Nebraska State Journal. In common with other people he has been wondering why women go to so many parties when the effort often makes them so tired that they can scarcely drag one foot after another, and now knows. The lady who elucidated this problem says that she often attends parties when she doesn't want to go at all, because she is compelled to do so by the fear that people will think she was invited. This accounts for the queer assortment of guests found at many large parties, for this lady seems to voice the sentiment of many.

A lady left out of the party has the desolate feeling of the small boy who is not "in it." In consequence of this, women with no possible community of interests or tastes are brought together by mutual entertainment, when they simply have no use for each other. Under these conditions parties are sometimes wearisome affairs, but satisfy the pride of both hostess and guest. The latter gives indubitable proof that she really was invited, and the hostess shows to her acquaintance that she had the right to invite this especial guest. The fact that neither enjoys the other's company has nothing to do with the social amenities.

### FARM WORK BY "SIGNS."

Quaint Customs Find Favor Among the Pennsylvania Dutch.

The farmers of the township of Fayette, adjoining Waterloo, are largely of Pennsylvania Dutch origin, says the Rochester Post Express. They are a hardy and thrifty race, and/or general intelligence compare favorably with their neighbors of Anglo-Saxon stock. They are however, full of the quaint superstitions and rural folk lore of their forefathers, and many interesting anecdotes are told by Fayette people illustrating the length to which the good Dutch yeomanry go in their devotion to the "signs" in the conduct of their farms and the routine of their lives.

In all earthly matters the almanac seems to be their Bible, and the moon and the constellations are as really venerated, though in a different way, than they were by their yellow-haired ancestors along the shores of the North sea. Not only in the tilling of their land, but in all the minute concerns of their daily lives the "signs" must be right before anything is done, or—"wot befit."

If a cheese is to be cut it must be done in the increase of the moon, or by the same token, it will fade away with incredible rapidity before the daily demands of the family, who will yet derive a miraculously scanty nutriment therefrom; whereas if, in obedience to the sage counsel of the elders of the house, it is done as the moon waxes, it will like the widow's morsel be of meat and curse of oil.

### RESOLUTIONS

Upon The Retirement of Dr. Ray  
And Mr. Leavell.

Expressions of Confidence And  
Good Will For Retiring  
Officials.

At the regular business meeting of the board of commissioners of the Western Kentucky Asylum for the Insane held Tuesday resolutions were passed in reference to the retirement of Dr. W. W. Ray from the superintendency and Judge Buckner Leavell from the stewardship of the institution. Concerning Dr. Ray, the resolutions say:

Resolved, that it gives us great pleasure as members of the Board of Commissioners for the Western Kentucky Asylum for the Insane, to express our very high regard for Dr. W. W. Ray, who has just retired from the position of superintendent of this institution.

We have found him in every respect a capable, painstaking and efficient officer, who has not only administered the affairs of the institution wisely and well, but who by uniform gentlemanly bearing and courteous treatment of all with whom he has come in contact, has endeared him to us and we desire to assure him that we are his sincere well-wishers and that we hope he may meet with the eminent success in all his undertakings that he so richly deserves.

And that the secretary of the board be directed to present Dr. Ray with a copy of this resolution. The following resolutions were also adopted concerning Judge Buckner Leavell:

Whereas, it has come to our attention that our worthy steward, Judge Buckner Leavell, is about to sever his connection with this institution, and,

Whereas, it has been our pleasure to serve with him during the past two years, in the management of the Western Kentucky Asylum for the Insane, now it be

Resolved—First, that we take great pleasure and pride in saying that in all our experiences with Judge Leavell as a steward we have found him a faithful officer and always true to the best interests of the institution.

Second, That we hereby offer this, our testimonial of our appreciation of his services as an official, and hereby express our regret at his severing his connection with this institution, the relationship of which has been very pleasant.

Third, That we wish for him in his new field of labor, success.

Fourth, Be it further resolved that we now extend to Judge Leavell our heartfelt thanks for his courteous treatment to us, and that these resolutions be spread on the record book of this asylum, and that a copy of same be furnished Judge Leavell.

At 11 o'clock in the morning services were held in the House and eulogies pronounced by Senators Boiles, Hickman and Farris, Representatives Bourne and Spaulding. In the afternoon a thousand persons visited the grave of Gov. Goebel. At night the exercises were concluded by a speech by Mr. Bryan in the opera-house to a large crowd. He was introduced by Gov. Beckham.

### R. V. PENDLETON, SR.

Brief Sketch of Prominent Citizen  
of Pembroke.

The death of Mr. R. V. Pendleton, Sr., of Pembroke, a brief notice of which appeared in the Kentucky Journal last Tuesday, removed from that section one of the best men of the county. His father, Robert V. Pendleton, was a native of Virginia, having been born in Spotsylvania county, and moved to Christian county more than 90 years ago. After about a year he returned to the Old Dominion and entered the army, serving in the war of 1812. A few years later he returned to Kentucky and located in Christian county, near Pembroke.

The grandfather of the subject of this sketch was a noted Baptist minister of Virginia.

Mr. Pendleton was a very suc-

cessful man and large landowner. His wife was Miss Helen Slaughter, of this county. In politics he was a Democrat. He was also a member of the Masonic order, being the first Master of the Pembroke lodge, which was organized about 18 years ago. At the last annual meeting of the lodge he was re-elected.

He was a man well liked by all who knew him and in his death Pembroke has lost one of its most valued citizens.

The body was interred in the Pembroke cemetery Tuesday.

### ALLEN-POLLARD.

Erlington Man And Arkansas  
Woman Married Here.

### STICKEN WITH PARALYSIS

A Month Ago And Died Last  
Tuesday.

Mrs. Drucilla Armstrong died at the home of Mr. Ed. Wooldridge, about two miles west of Crofton Tuesday from the effects of a stroke of paralysis.

She was 95 years old and was stricken about a month ago.

She was a sister of the late Green Wooldridge and was probably the oldest woman in North Christian.

David Wooldridge the railroad man of Hopkins county, is her nephew.

She leaves a large number of descendants and relatives in northern portion of the county.

## FOR HIS HONESTY

How a Filipino of Cebu Proved His  
Trustworthiness.

But Maj. Smith's Lesson Was Lost on  
the Dusky American Citizen and  
Now He Trusts Them  
Not at All.

Our army officers serving in the Philippines have often found themselves charged with the performance of duties entirely outside of their ordinary professional work. They have been called upon from time to time to guide the political machinery of towns and cities and provinces, to give new direction to ancient customs, and to mould anew the every day affairs of the communities in which they served.

As a rule the people of the Philippines, in common with most oriental peoples, have a vague conception of the requirements of the Ten Commandments. In attempting to teach the great principles embraced in these creeds, our officers and men have usually found the ground on which the seed was sown, productive of good results, but fruitful also in producing bad and undesirable effects in the heat.

The experience of Maj. Smith while living in Cebu may afford a fair illustration of the trend of a half-wakened conception of moral obligations among the people of that primitive Mohammedan city, due to the lascivious work of the Devil and his other confederates.

After making a purchase one day at the counter of a native dealer, the major was unable to find a paper dollar he had taken with him to pay for the purchase. Leaving the article on the merchant's counter he returned to his quarters and after a long delay, came back again, stating that he had found it on the floor beside the counter where the officer had stood when he made the purchase.

The major was delighted at the evidence of honesty shown by the young Filipino, who had probably never possessed as his own so great a sum, or had ever before been subjected to so great

Goethe, the celebrated German poet, and author, held the latter opinion,

"KEEP IT FOR YOUR HONESTY."

a tendency to dishonesty, and determined to give the young man an object lesson on the value of honesty.

"Keep it," he said to the Filipino. "I will make a present of it to you. Keep for your honesty."

And so a great lesson had been taught, and the boy was pleased, and the servant pleased, the former because good seed had been sown in Cebu, and the latter because he had become a Crosses among his fellows.

Not long thereafter the major's wife, while purchasing some fruit in the market, dropped a small coin on the counter and when she found it after a brief search returned it to her home, leaving Precio de Corazon Perez e Altura to follow with the fruit she had bought. The youth lingered at the place where the money had been lost and searched for it until he found it in the pocket of the major, hastened home with the fruit, but, notwithstanding the object lesson, he had received from the major, kept the coin and remained silent.

When the madam came again to the market the duster hastened to inform her that the boy had found the coin she had lost.

And so the object lesson of honesty taught by her husband seemed lost as well as the coin. The tares had early made their appearance among the wheat. The major was wroth when he was informed that the boy had been given up as proven unfaithful, and hastily calling the young man into his presence upbraided him for his dishonesty. The servant listened to the vigorous words of the major in amazement, and with much evident distress.

"You found the money," roared the major, "and you kept it."

"Si, Señor," replied the servant, meekly.

"You knew to whom it belonged and yet you did not return it."

"No, Señor," replied the man. "It was like the other time, you know. It was just like the other time," he repeated meekly, "and I kept it for my honest."

It is 292 feet high and its inclination is as much as three feet four inches from the vertical. It can easily be ascended, and possesses a fine view of its surroundings. The near neighbor of Asinelli is the Garisenda tower, built about the same time as the former, by the brothers Filippo and Oddo Garisenda.

The near neighbor of Asinelli is the Garisenda tower, built about the same time as the former, by the brothers Filippo and Oddo Garisenda.

There are two theories as to the cause for the remarkable inclination of these massive structures. One is that originally these towers were built upon a perpendicular base, but violent construction of nature had in the distant past, of which no record is given, had thrown the towers out of plumb, but not enough to destroy them. The other view held is that the towers were constructed exactly as they are seen to-day, the architect aiming at odd and unique in their construction.

Goethe, the celebrated German poet, and author, held the latter opinion,

lar, with only one angle, at its southern corner to break its spherical character, as will be readily seen by a glance at the map. The route of the race is called the Saarburg-Limburg course, from the towns at either end of the course. The starting post will probably be at Dornholzhausen, a hamlet frequented by guests in the summer time, with the start and finish at Saarburg. The total distance of the race will be approximately 10 miles, and over roads of remarkable smoothness and with few bad or dangerous turns.

Prince Henry of Prussia, who himself is a practical and enthusiastic automobileist, and has been over the course, pronounced the roads excellent.

"One of the most beautiful roads I have ever seen, and as smooth as a bowling alley."

The party of inspection which went over the route reported that it was

of but one opinion, namely, that there

was no part of the road which was dangerous beyond the first mile, and the majority of cars could be seen well ahead.

The surface was well constructed,

but with few damp parts, and the steep hills met with along the whole course were found to offer no difficulty in climbing, as there were none which gave even a hint of a chance of falling off the racing auto which would take part in the contest. In short, it was pronounced an ideal course.

In some cases where the curves are con-

sidered too severe it is proposed to re-

consider the fault.

The main part of the entire course is situated on the other side of Weil-

bach. It rises at an angle of 15°, and brings one to a broad and ever rising road, along which four automobiles could easily race abreast. About nine miles before Limburg, bearing now to the west directly, the road begins to curve to the right, and this will proba-

bly require some alteration before the race.

But a splendid bit of road now passes through open country past Ober-

teufenbach, along which the automobile flies easily down to Limburg.

A clear, straight run of 28 kilometers

—17½ miles—is given from Limburg to

the worst turn on the course.

With this view of the matter, Garisenda may be considered to have begun the rivalry a little after the Asinelli tower and may be looked upon as a memorial to the author of the pride of the city, even large house was a fortress, and the towers were built as a mark of importance and distinction, and as at last a perpendicular tower became a perfectly common and everyday object, a leaning tower was built. Architect and owner attained their object, the mass of towers are just glories, and all spectators hurry on to examine the leaning towers.

With this view of the matter, Garisenda may be considered to have begun the rivalry a little after the Asinelli tower and may be looked upon as a memorial to the author of the pride of the city, even large house was a fortress, and the towers were built as a mark of importance and distinction, and as at last a perpendicular tower became a perfectly common and everyday object, a leaning tower was built. Architect and owner attained their object, the mass of towers are just glories, and all spectators hurry on to examine the leaning towers.

Formerly Cooper, the popular

American author, held the same view as Goethe as regards the origin of the singular inclined character of the towers.

He examined them carefully, and wrote in defense of the towers no more than that they were the result of the least derangement of the parts of the towers within or without.

Thus lead one to conclude that the towers were built out of the perpendicular and not made so by earthquake after they were built.

One reason why it is thought that the towers were originally upright is that the foundations on one side appear to be buried, and it is said that the tower is an ancient painting which represents one of the towers as upright.

Dante writes of the towers in his Inferno, and in his Purgatorio, he says:

"The towers of Bologna stand on the heights of hell."

Bologna is much interested over the

case of the Garisenda tower and the

government has been urged to interfere

for the purpose of securing it.

Passing through the roads, making an irregular turn for the southern segment of the circle instead of continuing for some ten miles more to Frankfort, the racing automobile will make for Ober-

ursel, leave Homburg a little to the right and back Saarburg, a distance of 15 miles, and a distance of 400 miles.

A grand stand will be erected on the crest of Saarburg hill to seat 40,000 people, and it is at this point that the majority will gather to witness the start and finish of the race. The interest of racing automobileists in the race is the attendance of adequate numbers of

soldiers to police the course, and pre-

vent the obstructing of the roadway by

the spectators.

## COMING AUTO RACE

A Big International Contest Planned for Next Summer.

Will Take Place in Germany and the Route Selected Meets the Approval of Emperor William and Prince Henry.

The international automobile race planned for the summer of 1902 will be held in Germany and the route, which has just been decided upon, will be the approval of Emperor William. His endorsement will make easy the overcoming of possible objections by the authorities of the districts through which the race will be run.

The German Automobile Club

has two routes to choose from.

The first is the Saarburg-Limburg

course, from the towns at either end of

the course. The starting post will

probably be at Dornholzhausen, a hamlet

frequented by guests in the summer time,

with the start and finish at Saarburg.

The total distance of the race will be

approximately 10 miles, and over roads

of remarkable smoothness and with few

bad or dangerous turns.

There are people who let themselves

run down physically until they live just

on the edge of the danger line, between

health and sickness. Some day they

stagger across the line, and disease, like

a bird of prey swoops down on them and

they have to fight for life. The weak

body invites disease. As the strength

of the body is solely derived from

digested and assimilated, so physical

weariness points to the fact that the food

eaten is not assimilated and the body

is growing weak through lack of nutri-

tion.

Dr. Pierce's Golden Medical Discovery

cures diseases of the stomach and other

organs of digestion and nutrition, and

so enables the perfect digestion and as-

similation of food, by which the bodily

strength is alone sustained.

"Thanks to Dr. Pierce's Golden Medi-

cal Discovery," writes Mr. Charles H. Geil-

lingham, Pa. "It is the best medicine

that I have done well and good. I tried every-

thing I could think of to cure indigestion, and

found I was only throwing away money

by taking Dr. Pierce's Golden Medi-

cal Discovery and taking a bottle of it, and to my

joy found it was doing me good. I used six

bottles of it, and am now cured. It is the

best medicine in the earth."

The sole motive for substitution is to

permit the dealer to make the little more

profit paid by the sale of less meritorious

medicines. He gains, you lose; therefore

accept no substitute for "Golden

Medical Discovery."

The route of the race is as follows:

**RED BANANAS AGAIN.**  
Have Long Been Scarce—Fast Fruit Steamers Help Trade.

"Red bananas once more are plentiful in the New York market, and are likely to be so for some time," said a fruit commission merchant to a New York Press reporter. "I can remember the time when there were more red bananas than yellow ones, 15 or 20 years ago. Then they got scarce. Six years ago only a few bunches came to New York for the Christmas trade, and they went to dealers at \$75 a bunch, the highest price ever paid here for such fruit.

"The red banana was the first to come to this country. Then it was found that the yellow fruit was more easily raised, kept longer and clung better to the stalk. This last factor was an important one, as a great loss comes from bananas dropping from the bunch. More yellow grow on a bunch. For these reasons the red bananas practically disappeared from the markets and only a few bunches were brought here."

"The fast fruit steamers have been responsible for lowering the price of bananas. When we had to get our fruit from the sailing vessels we never knew whether we would have enough to supply the market, for the vessels would be delayed by storms and might come in with spoiled cargoes. Today these fruit steamers are as regular as passenger ships, and we know almost to a bunch how much the cargo will amount to."

**"SQUATTERS" IN MAINE.**  
Land Owners Want to Keep Forests for Lumbering Purposes.

A way up on the northeastern border of Maine, along the St. John and Aroostook rivers, says the New York Tribune, are hundreds of little clearings in the forests where "squatters" from New Brunswick have come in cleared a few acres of land not belonging to them, built log houses, raised small crops and large families and settled down to the rural and happy existence known only to the Acadians, who are the direct descendants of the refugees from the Land of Evangeline. The men who own the lands have tried in all sorts of ways to get rid of these uninvited colonists, and on numerous occasions have invoked the law to drive them away. They followed evictions by the score, with scenes as pathetic and distress as bitter as any ever witnessed in Ireland, but the remedy has always been ineffective, for more "squatters" came in to occupy the lands, and not all the law could do.

The little farms increased from scores to hundreds, and the timber land owners appealed to the state to do something lest their entire holdings be one day absorbed by "squatters," and so last winter the legislature passed an act appropriating enough money to buy 50,000 acres of the land to be presented to the settlers, thus making good their title to what they had come and taken without leave.

The state also has "squatters" to contend with, for many of them have settled on the school lands, and lately it has been decided, instead of evicting them, to sell them the lands they are occupying at a nominal price. For the purpose of making these transfers State Land Agent Ring has recently made a trip to Letter E plantation and in a short time the settlers there will have full title to their little farms.

While it is not denied that the settlement of the rich Aroostook lands by the industrious and well-educated Acadians must result in great benefit to the state, the land owners are strongly opposed to the colonization process. They bought the lands and paid for them, and want to keep them for lumbering purposes; they are looking to their own personal interests, and not to the interests of the state in future years. It is frequently pointed out that the owners of the lands got the property, or much of it, for a mere song, but their title is good, whatever they paid, and while the "squatters" who want to farm and the sportsmen and poachers who want to shoot and fish complain that the rich men are monopolizing the earth up north, no one has any legal ground for complaint.

The wild lands of the state were at first parceled out as bounties to revolutionary soldiers, but many of the beneficiaries failed to pay the taxes from the lots given to them, and so the lands came back by forfeit to the state. Then came the famous land auctions of old days, when vast tracts were bought by wealthy men at a few cents an acre.

After generations of lumbering there is more spruce left in Maine than can be cut, at the present rate, in half a century to come, allowing nothing for renewal of growth, and now the pulp and paper industry has come, doubling the value of the timber, and causing the big corporations to scramble for all the desirable lands in sight.

In New Jersey there is a variety in which the fruit is cream colored when fully ripe, and remains so even if kept for many months.

They are of good size, excellent flavor and keep well. The brighter-colored berries bring the best prices, though not always of the best flavor. Some berries turn red after picking. The best flavored varieties are of medium size, many of the large varieties being hollow. Small berries are the best keepers and also the most solid.

The work of planting the vines often falls to the women. Two work together, one dropping the vines into the drifts from a bundle which she carries under her arm, the other following with a hoe. The picking season is eagerly looked forward to by the owner and his help. In the marshes of New Jersey they begin picking a certain variety about the middle of September. The other picking usually begins about the first of October, as all berries must be off the vines before frost comes. In the fine October weather almost a picnic is made of the work, and women and children turn out to the fields with bright faces and well-filled lunch baskets. Care must be taken to prevent bruising, but if picked in small baskets and immediately poured into the shipping basket there is little loss from bruised fruit. A portable fan is attached to the basket or barrel into which they are poured, and by this means all dead vines, sticks, leaves and dry berries are blown away.

**THE CRANBERRY.**  
Where They Grow and Some Peculiarities of the Fruit.

The name of the cranberry is probably derived from the peculiar appearance of the bud before expanding into the perfect flower. The stem, calyx and petals somewhat resemble the neck, head and bill of a crane, giving the fruit the name of "cranberry" or "craneberry." The small variety of cranberry is found on the peat bogs of the New England states, of Pennsylvania and westward to Wisconsin. A certain variety, says the Prairie Farmer, is found in the bogs of Virginia and Minnesota and in the British possessions. New Jersey is one of the great cranberry states, and in South America, Russia and occasionally on the barren plains of Siberia the cheery little berry is found. It grows wild in many parts of North America, but the two chief points of cultivation are Cape Cod and New Jersey, with minor points in Maine and the northwestern states. When the supply was limited and could be procured only from the wild marshes, cranberries were very cheap. But since they have been made an object of cultivation and displayed in the markets, many persons heretofore ignorant of the existence or use of such a fruit have experimented with it, and the consequence is that cranberries now bring a very high price.

The cranberry is peculiar in its tastes and habits. On some soils it cannot be made to grow at all, while on others it is hardy and easily propagated. In such places vines dropped upon the ground often take root and grow. Its favorite resorts are swamps and marshes which contain rich decomposed vegetable matter known as muck. During the wet season the swamps flood, but if they are suitable for cranberry growth they must dry during a portion of the season, though they seldom dry to a depth of more than one-half inch. Vines may appear to flourish in a swamp which is wet the entire season, but if closely observed it will be seen that the roots are embedded in the moss growing above the water, the moss having the property of retaining enough moisture to support the vine. The soil best adapted is an equal mixture of coarse sand and muck. In a few years this will form a soil of rich black sand. If a plant is on weak land it will run to vine.

In New Jersey there is a variety in which the fruit is cream colored when fully ripe, and remains so even if kept for many months. They are of good size, excellent flavor and keep well. The brighter-colored berries bring the best prices, though not always of the best flavor. Some berries turn red after picking. Just after the marriage ceremony had been performed the marshal received a message from the girl's father to place the couple under arrest. When the marshal arrived on the scene the knot had been tied.

The young girl went to the telephone, and after a few sobs, the father relented and bade the couple return to his fireside. The young girl procured her father's signature while making him think she wanted to see him write his name. She wrote the necessary order to the clerk above his signature.

## Great

## Bargains

In Wall Paper at

Jack Meadow's

I have a large number of Patterns of handsome Wall Papers, just enough in a pattern for one room of a kind. These goods are from 25 to 35¢ per roll, in order to get them off quickly, I am selling them all at 10¢ per roll. I am doing this to get a little much needed cash and make room for the new Spring stock.
